For intro-level, one-semester multidisciplinary science and astronomy courses. Encourage students to explore answers to questions about life beyond Earth and our solar system. Life in the Universe provides an ideal starting point for non-science majors intrigued by the latest discoveries about life in the solar system and beyond. Rigorously researched and accessible to students of all backgrounds, the text introduces concepts drawn from astronomy, biology, and geology to explain natural phenomena and to explore profound scientific questions about astrobiology. The Fourth Edition has been thoroughly revised and updated to include the latest scientific discoveries and advancements, including new information regarding extrasolar planets, artificial life, and early life on Earth. Designed for courses in astrobiology, Life in the Universe arouses students' natural curiosity by exploring fundamental questions such as: How did life begin on Earth?
